

INGLESHAM CHURCH

ST. JOHN THE BAPTIST, INGLESAM, WILTSHIRE

4 Inglesham is a medieval church. It was an early SPAB case on which William Morris worked.

Thorough phases of repair have been achieved which were highly complex to retain the original fabric as found. It involved wall painting conservation, stone tiled roofs, structural tying, conservation, masonry repairs, and ground drainage.

5 Repairs were kept to an absolute minimum. They were intricate and gentle to leave the building as found.
